

## INTELLIGENT COMBINATION OF ENERGY AND AGRICULTURE: AGRINERGIE® IN MAURITIUS

Henrietta's 17.5 MWp solar photovoltaic farm is developed by Akuo Energy, France's leading independent developer of renewable energy.

The 21-hectare Henrietta solar power project will be fully fed into the CEB's national electricity grid, replacing the country's energy mix (mainly coal/oil) with clean and renewable energy, reducing greenhouse gas emissions associated and benefit more than 40,800 households. The promoters intend to reconcile energy and agricultural production that are best suited to the site conditions, hence Henrietta's Agrinergie concept which will operate a sheep rearing/lamb production unit and beekeeping within the boundary of the site.

### PROJECT IDENTITY

**PROJECT OWNER**  
Akuo Energy

**PROJECT**  
Henrietta Solar PV Project

**LOCATION**  
Henrietta (Mauritius)

**CO<sub>2</sub> EMISSIONS AVOIDED**  
25,600 tonnes/year

**CERTIFICATION**  
CDM (UNFCCC)

**STATUS**  
Project under construction and certification on-going

**AERA GROUP SERVICES**  
Carbon certification support

### KEY FACTS

**40,800**  
BENEFICIARIES

**25,600**  
TCO<sub>2</sub> AVOIDED/YEAR

**26,500**  
MWH PRODUCED/YEAR
